

Garinim Medium Term Planning

September 2018/Autumn Term/First Half

Theme for the Year: Developing a relationship with our School and Community and Cycles

Interdisciplinary Project: **Starting School**

Overview of Topic: (Big Ideas/Conceptual Understanding)

The first topic of the year has been planned to reflect the beginning of a new phase of the children's lives and education. During the first term we will be thinking about how to live and learn in our new space, how to care for it and how to make it our own. These ideas will be closely related to and interwoven with the concept of new beginnings, the new school year and the ideas of the Jewish holidays of Tishrei, the first month at the start of the new Jewish year.

At this time of year a main priority in the classroom is always building community, creating an enabling learning environment, developing strong relationships, learning helpful routines and understanding expectations.

Essential Questions:

- Where were we before starting at Eden? How are things the same/different now the children have started school?
- How can we make sure that we feel secure and happy in a new environment such as our new school?
- How can we create a good environment to learn in?
- How do we care for and get to know each other, our new school and its resources?
- What is important about Tishrei and the beginning of the Jewish New Year?
- What are the children's hopes for the New Year? What would we like to learn this year?
- What is Yom Kippur? What do we need to say sorry for?
- What is Sukkot? What do we harvest at this time of year?
- What is the Torah?

Project Launch: Starting School

Each child will receive a home visit to create links with school before they start, to start to make relationships with the teachers in the classroom and to create excitement about coming to their new school.

Culminating Project: Writing a book about starting school

Children will write a book about their start at Eden Primary.
